Connecting Up
Connecting Network

This section introduces the network connection methods for STB. Select one method to connect according to the on-site conditions.

Video and Audio Connections

Steps

- Connecting 3.5 mm RCA AV Output Interface

1. Connect the **R** and **L** interfaces on the TV to the corresponding interfaces with the AV cables.

2. Connect the **AV** interface on the TV with the AV cable (yellow), as shown in the follow figure.

- Connecting High Definition Interface

Connect the HDMI interface on the STB and TV with HDMI cable, as shown in the follow figure.

Power ON

Steps

1. Ensure that all cables are connected correctly.

2. Install the power cable to STB using the power adapter and to AC power source.

3. Ensure that all other devices are plugged in and receiving power.

4. Turn on the TV.

—END OF STEPS—

Upgrade

The STB can connect to the server on each power-on and check whether an upgrade is required. If so, the upgrade starts at once, which normally takes about ten minutes. Do not perform any operations during this period.

Operation Guide:

Switch between the standby and working state

Press the key on the remote control to enter the Launcher homepage.

Press direction keys (up, down, left, and right) on the remote control to select an item.

Press **OK** key to confirm the selection. Apăsați lung tasta pentru a începe preluarea vocală, indicatorul se aprinde; eliberați tasta

pentru a opri preluarea vocală și pentru a stinge indicatorul luminos.

Volume Operations:

Turn up/ down volume of STB.

a. Long press at the (OK) + button for 3 seconds (indicator light flashes), until pairing successful. Indicator light will turn to be always on for 3 seconds and then turns off.
